Separating People from Hazards

Safety Solutions for the Manufacturing Industry

KEEP YOUR TEAM SAFE FROM WORKPLACE HAZARDS

Engineered Fall Protection & Safe Access Solutions for Manufacturing Facilities

Prevent falls. Protect workers. Maintain compliance.

Falls remain one of the leading causes of workplace injuries. Manufacturing facilities require safe access to rooftops, equipment, and elevated work areas while meeting OH&S requirements.

Whether workers are performing inspections, maintenance, repairs, or accessing production equipment, protecting them from fall hazards is essential to maintaining a safe and compliant workplace.

Key Safety Considerations

- Working at height during rooftop inspections and maintenance
- Accessing HVAC equipment and rooftop mechanical systems
- Safe movement across rooftop obstacles
- Protecting ladder, stair, and roof hatch access points
- Safe access to difficult-to-reach production equipment
- Maintaining compliance with OH&S requirements

Creating safe access routes and installing permanent fall protection systems helps reduce risk, improve worker safety, and keep manufacturing operations compliant.

ADDRESSING SAFETY RISKS ACROSS MANUFACTURING FACILITIES

Challenge: Unprotected Rooftop Edges & Elevated Work Areas

Kee Guard®

Non-penetrating guardrails are the industry's leading modular, free-standing safety railing system.

Provides passive fall protection without penetrating the roof.

Exceeds 200 lbs/ft requirements to give you peace of mind.

Corrosion resistant, all fittings are galvanized to EN ISO 1461.

Versatile design makes it a snap to negotiate around obstacles.

**Kee Guard
for Narrow Spaces**

**Kee Guard
for Metal Roofs**

**Kee Guard
for Ladder Access**

CSA Compliant: The Kee Guard system is fully compliant with Canadian safety regulations, meeting and exceeding the relevant OH&S standards.

Proudly Made in Canada: The Kee Guard Counterbalance Weight is manufactured locally

Challenge: Rooftop Access Across Obstacles

Kee Step®

Provide workers with a safe, anti-slip route over pipes, conduit, HVAC equipment, and other rooftop obstacles.

Create a custom approach for a level or offset surfaces ensuring safe access

Made from tubular fittings and standard modules so it can be installed on site without any welding.

Challenge: Fall Hazards at Roof Access Points

Kee Gate®

A fully adjustable range of self-closing safety gates for use in rooftop or hydroelectric plants.

Our gates are spring-loaded, so they automatically close behind the user.

Fits different surfaces and can be used for external and internal applications.

Choose between a single or double width so you have the right size.

Challenge: Accessing Difficult-to-Reach Equipment Safely

Kee Platform®

Provides safe elevated access to production equipment, machinery, and facility infrastructure while reducing risks associated with ladders or improvised access methods.

Custom-tailored platforms designed to suit your exact work application

Available in both corrosion resistant galvanized steel & anodized aluminum.

Pre-assembled sections mean less on-site disruption during installation

Challenge: Creating Safer Walkways & Machine Access Areas

Kee Klamp®

Weldless handrails, safety barriers and guardrail systems that exceed OH&S safety standards.

Galvanized inside and out to guarantee corrosion resistance.

Flexible modular system for building compliant guardrails and structures.

Rigorously tested and backed by a global network of support

A Trusted Partner for Manufacturing Safety

Kee Safety Canada provides engineered fall protection and safe access solutions that help manufacturing facilities protect workers, improve compliance, and create safer workplaces.

Contact our team to discuss the best safety solutions for your manufacturing facility.
